## **2017 Annual Scientific Meeting Saturday, April 29, 2017**

**Samis Education Center  
University of Oklahoma Health Sciences Center Campus  
Oklahoma City, Oklahoma**

**Dear Colleagues,**

You are cordially invited to attend the 2017 Oklahoma Chapter American College of Cardiology Annual Scientific Meeting on Saturday, April 29. The meeting site will be at the Rainbolt Family Auditorium in the Samis Education Center on the OU Health Sciences Center campus. This exciting program features speakers from both Oklahoma and outside. Please plan to attend this session, which provides a great opportunity to earn 6.00 *AMA PRA Category 1 Credits™*, to listen to nationally noted speakers, to network with cardiac care providers from diverse communities within the state and to get to know cardiology fellows-in-training.

Cardiovascular science is constantly evolving, with both new discoveries and new therapies being published each year. This educational activity will provide the cardiovascular professional team with an update on a selected number of high-priority items identified from environmental scanning, with discussion of both the science and evidence behind current recommendations. The overall goal for this year's conference is improvement of patient care through increasing learner competence, leading to improved performance in applying evidence-based use of evidence-based treatment options. Topics emphasized at this session will include gender differences in the presentation and diagnosis of heart disease, interventional therapies in chronic total coronary occlusion, updates in stent therapies, guideline-directed medical treatment of heart failure, current application of newer cardiac imaging and bridging anticoagulant therapies during the peri-operative period.

*Chittur A. Sivaram, M.D., F.A.C.C.*

# Policies

## Overall Description

This annual one-day meeting is an exciting program that will highlight world-class faculty discussing up-to-date information about drugs and technologies that are indicated in a variety of common cardiovascular diseases. The content will be oriented toward the entire cardiac care team. The educational objectives of the session will address the skills required of cardiovascular professionals for providing evidence based care to patients with cardiovascular disease. The intimate format of this meeting will allow the audience to interact with invited speakers, network with colleagues from across the state and meet the cardiology fellows-in-training within the state.

## Target Audience

Adult Cardiologists, Pediatric Cardiologists, Cardiothoracic Surgeons, Cardiology Fellows-in-Training, the entire Cardiac Care Team, including but not limited to: Nurses, Nurse Practitioners, Clinical Nurse Specialists, Physician Assistant, Pharmacists

## Overall Need Statement

Cardiovascular science is constantly evolving, with both new discoveries and new therapies being published each year. This educational activity will provide the cardiovascular professional team with an update on a selected number of high priority items identified from environmental scanning, with discussion of both the science and the evidence behind current recommendations.
