

Eliza F. Chakravarty, MD

Dr. Chakravarty received her MD from The Johns Hopkins School of Medicine. She completed her fellowship in Adult Rheumatology and earned a Masters Degree in Epidemiology at Stanford University School of Medicine. After 10 years on faculty at Stanford, she relocated to OMRF to further pursue her clinical and research interests. One of her main clinical and research interests is reproductive health in rheumatic diseases. It is known that women with lupus have higher risks of obstetric complications than do healthy woman, and Dr. Chakravarty has spent her career trying to understand and modify risk factors for adverse pregnancy outcomes as well as optimize medical management of underlying autoimmune diseases during pregnancy and lactation to improve the health of both moms and infants. She served on the core leadership team for the recently published American College of Rheumatology 2020 Guidelines for the management of Reproductive Health in Rheumatic and Musculoskeletal Diseases.
