

Robert M Jacobson is a Professor of Pediatrics at Mayo Clinic with appointments in Community Pediatric and Adolescent Medicine, Pediatric Infectious Disease, and Health Care Policy and Research. He works as a primary care pediatrician at Mayo Clinic in Rochester, Minnesota; teaches research methods and evidence-based medicine to faculty, pediatric residents, and pediatric subspecialty fellows there; and works as the Medical Director for both the Employee and Community Health Immunization Program and the Southeast Minnesota Mayo Clinic Health System Immunization Program. He conducts research to improve the uptake of vaccines.
