

Sonali Nanda, MS MD

Sonali Nanda, MS MD is a current PGY-2 dermatology resident from Charlottesville, Virginia at the University of Oklahoma Department of Dermatology. Dr. Nanda completed a Master of Science in Narrative Medicine at Columbia University prior to medical school at the University of Virginia School of Medicine. Before graduating from medical school, Dr. Nanda pursued a year-long research fellowship in dermatology at The Philip Frost Department of Dermatology and Cutaneous Surgery at the University of Miami where she studied the neuropathogenesis of itch, frontal fibrosing alopecia, androgenetic alopecia, hidradenitis suppurativa, and topical chemotherapy for non-melanoma skin cancers. During this year, she co-authored multiple publications on these topics and continues to follow updates on new discoveries and treatments for these conditions. Her current passions in dermatology include hyperpigmentation and melasma in skin of color patients, pediatric dermatology, and surgery. Dr. Nanda aspires to become an advocate for her patients, continue clinical research, and specialize in Mohs surgery. She can be reached at the following email for any questions: sonali-nanda-1@ouhsc.edu.
